

Dr. Torque Presents

DIGI TORQUE V02

PB 9318 A

Torque Screwdriver With Digital Display

- for screwdriving work with repeatable tightening torque (certified +/- 6%)
- for interchangeable blades PB 53, torque range 10-50 cNm
- interchangeable blades with precise, true-to-size tips, optimal fit in the screw heads
- adapted smaller handle size for the low torques, perfect handling for comfortable working
- electronics with NFC interface, easy adjustment for recalibration with NFC or via key function
- turnable head with analog scale, easily adjustable without auxiliary tools
- exchangeable battery cell, type CR1/3N 3 Volt lithium

DIGI TORQUE V02

PB 9318 M

Torque Screwdriver With Digital Display

- for screwdriving work with repeatable tightening torque (certified +/- 6%)
- magnetic holder for C6 and E6 bits, torque range 10-50 cNm
- PrecisionBits with precise, true-to-size tips, optimal fit in the screw heads
- adapted smaller handle size for the low torques, perfect handling for comfortable working
- electronics with NFC interface, easy adjustment for recalibration with NFC or via key function
- turnable head with analog scale, easily adjustable without auxiliary tools
- exchangeable battery cell, type CR1/3N 3 Volt lithium

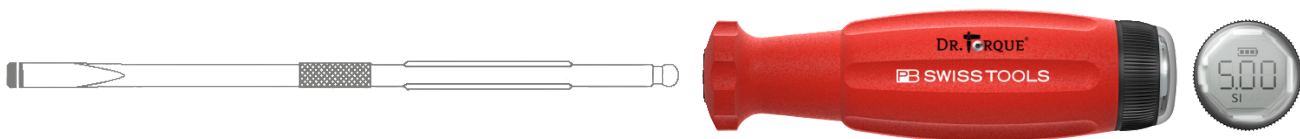

Dr. Torque Presents

DIGI TORQUE V02

PB 9320 A

Torque Screwdriver With Digital Display

- for screwdriving work with repeatable tightening torque (certified +/- 6%)
- for interchangeable blades PB 215, torque ranges 0.4–2.0 Nm or 1.0–5.0 Nm
- interchangeable blades with precise, true-to-size tips, optimal fit in the screw heads
- two-component handle with soft casing, comfortable handling
- electronics with NFC interface, easy adjustment for recalibration with NFC or via key function
- turnable head with analog scale, easily adjustable without auxiliary tools
- exchangeable battery cell, type CR1/3N 3 Volt lithium

Dr. Torque Presents

DIGI TORQUE V02

PB 9325 A

Torque Screwdriver With Digital Display

- for screwdriving work with repeatable tightening torque (certified +/- 6%)
- for interchangeable blades PB 225, torque range 3.2-16.0 Nm
- interchangeable blades with precise, true-to-size tips, optimal fit in the screw heads
- lever handle with soft surface, pleasant grip and optimum force transmission
- electronics with NFC interface, easy adjustment for recalibration with NFC or via key function
- turnable head with analog scale, easily adjustable without auxiliary tools
- exchangeable battery cell, type CR1/3N 3 Volt lithium
